

The DUPLO DC-615

The **DC-615 Slitter/Cutter/Creaser** performs exactly as it states: accurate creasing, slitting or cutting of digitally printed work. It is an ideal answer to the question of how best to finish many types of short run digital print which can result in cracking problems when using standard finishing machinery. The single unit offers a multiple of finishing options to create a myriad of professionally finished saleable products in a single pass. Duplo's understanding of the problems associated with digitally printed material has led to the inclusion of features to keep the unit operating to its full potential. Despite this versatility, the DC-615 is simple to operate thanks to touch-panel displays and well-conceived user interface.

Highlights

- Two rotary side trimmers
- Four rotary slitting knives
- Cross-knife cutting up to 15 cuts per sheet
- Variable depth creasing rule up to 10 creases
- Waste automatically delivered to collection bin
- Automatic adjustment of creasing depth
- 80 programme storage for repeat jobs
- 320x650mm maximum sheet
- 210x210mm minimum sheet

Typical Applications

- Greetings cards
- Folded leaflets and letters
- Brochures
- Book covers
- CD/DVD covers
- Menus
- Flat or folded business cards
- Point of sale cards

Paper Feeding

- Paper pile height: 100mm
- Air knife separation
- Suction feed, top belt
- Up to 9 sheets per minute
- Coated, uncoated & laminated stock
- Minimum finished size: 48mm x 85mm portrait (b/card)
- Sizes programmable in 0.1mm increments
- Paper weight 110–320gsm
- Paper curl: within +/- 3mm
- Finishing tolerance: 0.3 general, 0.4mm business cards
- Lead edge to first cut: minimum 3.2mm
- Gutter cut: minimum 4mm
- Tail edge cut: minimum 5mm
- Dimensions: L 1600mm x W 620mm x H 1050mm
- Weight: 132kg
- Power: 230Vac 50Hz 100W 0.7A
